

AquaOzone

A fresh idea

Industrial Cleaning Products

100% natural solutions for cleaning across a wide range of industries and applications.

AquaOzone provide environmentally friendly, safe to use ozone systems and products for water treatment, cleaning and disinfection.

A fresh idea... in cleaning solutions

Through our extensive experience in servicing industrial facilities and specialist laboratory equipment, we realised there was a need for an alternative cleaning solution. A product that delivers the effectiveness of a corrosive cleaning product, but also protects the materials the solution is cleaning and the people that come into contact with it.

Extensive research by Bio Gen Active found an answer in an unlikely source... cows. More specifically, by converting whey - a bi-product from cheese production - through fermentation into 100% natural cleaning solutions.

This fresh idea means AquaOzone can now offer you exceptionally effective, user-friendly cleaning solutions, made from natural, sustainable sources.

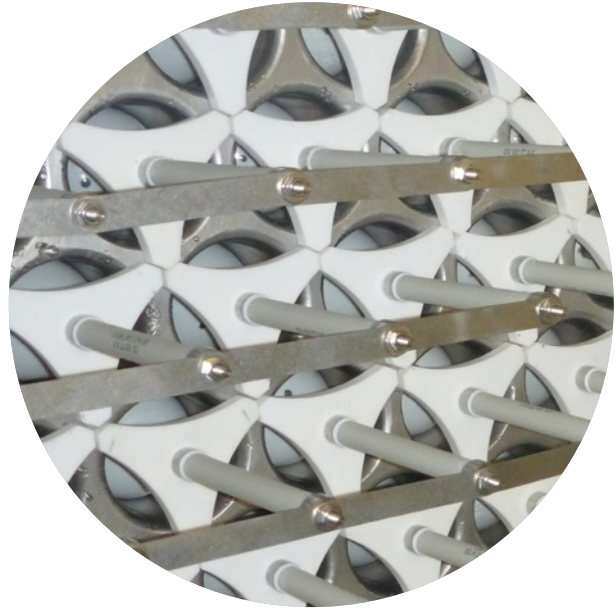

Exceptionally effective

We used AquaOzone Descaler 130 to clean the scale from this water treatment machinery.

Before

After

Where are these products used?

- **Water treatment facilities**
- **Hydropower**
- **Industrial application**
- **Laboratory equipment**
- **Heating and power stations**
- **Pulp and paper**
- **Gas, oil and steel**
- **Cleaning in Place (CIP)**

What are the benefits?

- **Effective** – these cleaning solution are extremely effective under the most extreme conditions but also protect the material or surface being cleaned.
- **User-friendly** – natural milk proteins and lactic acid base reduce the need for protective PPE equipment.
- **Environmentally friendly** – the products are made from 100% natural, sustainable ingredients that improve your business's environmental footprint.
- **No transportation restrictions** – these cleaning solutions are classified as only an irritant (Xi).
- **Cost effective** – due to the solutions' classification this reduces the cost of transportation and storage of the solutions onsite.
- **Unique technology** – the products are 100% biodegradable and, because of their unique properties, make this product range suited to a wide range of applications and industries.

AquaOzone Descaler 130

The AquaOzone Descaler is extremely effective in the removal of rust, lime scale deposits and other metal oxides.

The product's formula is based upon mild fruit acids, resulting in a highly effective cleaning solution that is also gentle on the surface material.

This product can be used to optimise CIP (Cleaning in Place) or can simply be used as a surface cleaner.

Applications include:

- Heat exchangers
- Chill rolls
- Tanks and cisterns
- Pipes
- Stator coolers
- Compressor coolers
- Green liquor coolers, black liquor evaporators, etc.
- Boilers
- Facades and cooling batteries with water deposits
- Tools and equipment with concrete/cement/rust

Product	Size	Weight	Code
Descaler 130	5L	5.75kg	4004001-5
	25L	28.75kg	4004001-25

AquaOzone Degreaser 691

The AquaOzone Degreaser is an exceptionally effective solution that penetrates dirt quickly. It is based on a self-splitting technology that, when left to stand, separates oil from its surface.

This product is made from environmentally-optimised surfactants, other surface active substances and silicone-based defoamer. This is an effective cleaning solution that is also gentle on the surface material.

It can be used to for cleaning greasy and oily surfaces, floors, walls and machine components, and even works well at low temperatures. This can be used to optimise CIP (Cleaning in Place) but can also be used as a surface cleaner.

Applications include:

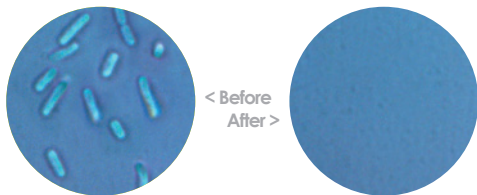

- General degreasing
- Oil rigs
- Floor cleaning
- Radiators
- Pipes
- Tanks and cisterns
- Refineries
- Facades and walls that have oily and/or biological dirt

Product	Size	Weight	Code
Degreaser 691	5L	5kg	4020001-5
	25L	25kg	4020001-25

AquaOzone Bio Concentrate

The AquaOzone Bio-Concentrate neutralises bacteria, listeria species, yeasts, fungi and influenza virus in pre-cleaned floors, walls, work surfaces, containers and equipment in food and beverage processing, dairies and allied industries.

It is based on a amphoteric surfactant system in aqueous solution, making it an effective disinfectant without being harmful to the user, materials or the environment.

Applications include:

- Floors, walls and work surfaces
- Conveyors
- Process equipment
- Containers
- Fogging

Product	Size	Weight	Code
Bio Concentrate	5L	5kg	4106601-5
	25L	25kg	4106601-25
